System Requirements For Xito Application Manager:

The game has been designed for 1080p display resolution with a minimal recommended framerate of 30 FPS. It is recommended to use a GTX 1070 or better video card or AMD Radeon R9 390 or better. There is a very low visual impact on computer hardware with only a handful of static and animated textures. A good GPU will allow the game to scale well on low-end hardware. Game Progression Screenshot The first turn of the game requires the player to place a vault down on the first available tile. The second tile should then be placed in the
